INDIA'S NO.1 RMC

**Enhance
durability with
multi-speciality
concrete**

UltraTech
DURAPLUS

Concrete decisions can't be reversed ever.

Choosing site-mix concrete looks cost effective initially but it is susceptible to multiple problems during and post construction, leading to expensive repairs and poor durability.

Numerous problems like poor work-ability, honey-combing, inconsistent strength, cracks & seepage are unavoidable with regular site-mix concrete.

These problems erode our customers' trust in our competence and cause irreversible damage to our reputation.

Introducing **UltraTech DURAPLUS**

An amazing concrete with the ability to fight multiple problems such as honeycombing, seepage & cracks to protect the durability of the structure.

Its unique mix design incorporates the right blend of ad-mixtures that ensures fast execution, superior finish and great durability. Choosing **UltraTech DuraPlus** enables you to deliver great build quality to your customers with complete confidence. Building a durable home for your customers & an enduring reputation for yourself is now possible with **UltraTech DuraPlus**.

**Why settle for the ordinary,
when you can build the extraordinary!**

Advantages:

- Increase in service life by up to 30%
- Ease of handling
- Reduction in honeycombing
- Reduced seepage and increased immunity against environmental attacks
- Higher resistance to cracks
- Reduction in labour
- Faster work completion
- Reduced repairs

Technical Specifications:

- Flowability - 400 to 550 mm
- Water permeability < 15 mm
- Rapid Chloride Penetration (RCPT < 2000 coulombs)
- Reduced water and chloride permeability
- Reduction in plastic shrinkage cracking

Application Areas:

- Foundations, walls, slabs, beams and columns
